Subject: Comments on Zoning Plan B

Reading Plan B from back to front was very enlightening and terrifying. Going to your comment suggestions I would suggest in the strongest possible language that **Sections 1** through 6 be removed entirely from the document. The very fact that the leader of the County Commissioners has publicly stated she has not read either draft A or B yet is determined to pass zoning regulations makes it pretty clear that public input has no value but one can certainly try.

It is certainly frustrating to be a large land owner and see all of our benefits of lifelong ownership going out the window with the bath water. It is also heartbreaking to see how totally corrupt this current board seems to be. Figures certainly are manipulated to and important only when supporting the pro zoning crowd. Have you looked at how much income in the form of taxes comes in from the two sides of this issue? I would ask for an explanation from Ms Grandstaff regarding her not taking the time to not just read but to totally investigate the impacts of the document she has committed to forcing down our throats? All we hear is the need for public input yet she makes it clear any input that does not support zoning is going to be ignored. And you wonder why no one trusts county government.

Sincerely,
Linda S Foss
